

Seaward PAC3760

The Seaward PAC3760 is a next generation PAT tester. It conducts earth bond, insulation and polarity tests, as well as Leakage Current Tests for Class I and Class II appliances and leads.

The PAC3760 powers up appliances and leads for Leakage Current Tests at 5mA Pass/Fail for Class I and 1mA Pass/Fail for Class II

To further improve the level of safety testing, the PAC3760's earth bond test is set at 10 Amps. This is beyond a multimeter's continuity test and is capable of fusing a poor earth held by a couple of strands.

The PAC3760's ease of use and smart automatic testing features make it simply the best solution for all manual testing and tagging applications, whether a Competent Person testing their own equipment through to the seasoned professional contractor.

Seaward PAC3760: The Next Generation Portable Appliance Tester

The PAC 3760 provides earth continuity, insulation resistance and leakage current testing according to the requirements of AS/NZS3760:2003.

The unique 3 push button operation, auto sensing of leads and auto detection that the appliance is switched 'ON' combine to make the PAC3760 the most up to date and affordable tester in its class

Seaward	Features
	PAC3760
Display	Bright LCD
Indication	Pass/Fail
Operation	3 Push Button
Enclosure	Hand-held
Leads	Earth Bond, IEC
Carry Case	Deluxe Padded
Dimensions(LxWxH)	265 x 110 x 55mm
Weight	1.5kgs

Seaward	Tests Performed
	PAC3760
Polarity	Yes
Earth Continuity	10A, 1ohm
Insulation Resistance	500V DC, 1Mohm
Class LeakageCurrent	5mA
Class I LeakageCurrent	1mA
MOVDevicesClass LeakageCurrent	5mA
MOVDevicesClass I LeakageCurrent	1mA
CordExtensionSetsLeakageCurrent	1mA

Seaward PATS	Results Displayed
	PAC3760
Polarity	Pass/Fail
Earth Continuity	Pass/Fail
Insulation Resistance	Pass/Fail
Class I Leakage	Pass/Fail
Class II Leakage	Pass/Fail
