Overview

Protect yourself and your employees by ensuring that your portable electrical appliances and equipment are tested for electrical safety to AS/NZS 3760.

Push button operation and easy to understand LED display makes the Patrol the simplest to use portable appliance tester on the market. All test leads and sample test tags are supplied with the Patrol so you can start testing as soon as you take it out of the box.

The Patrol will test all mechanically switched appliances, including power tools, domestic and industrial appliances, as well as power boards and extension leads.

Everything is tested to the Australian and New Zealand standard (3760) relating to appliance testing. If you are looking to test appliances, power boards or extension leads, and need a sturdy and dependable portable appliance tester, then the CZ5000 Patrol is the unit for you.
