

## WAVECOM TNT RCD KIT

**\$1089.00** EXCL. GST

Supplied with a heavy duty carry case, this kit includes Wavecom's G4 TNT RCD appliance tester and an Isolation Transformer for testing RCD's. Both of these will conveniently fit into the case, making it easy to transport your gear when you're on the road.

The updated Generation TNT RCD is similar to the -el model, but is considered one step up because it's capable of testing all 240V electrical appliances, including fixed and portable RCD's.

It's also capable of testing sensitive electronic equipment which can't be tested using a standard insulation tester.

Its reliability, simple operation and RCD functionality makes the TNT RCD a great entry-level tester.

### Features

- » Tests fixed and portable RCD's
- » PASS/FAIL indicator
- » Unit displays actual test readings
- » Impact resistant and flame retardant casing
- » Built-in carry handle
- » Unique Meter Mode function
- » Simple one button testing
