

## TRISAN S8

The battery and mains powered Trisan S8 is a reliable and compact unit, ideally used by people that require flexibility, a heavy duty protection case and advanced features.

The S8 appliance tester fully complies to the Australian Standard AS/NZS 3760 and provides an extra rugged and tough design to ensure the safety and easy portability of your tester.

Enclosed in a pelican brief carry case, it contains advanced features but still remains very simple to use, with PASS and FAIL indicators shown on the screen, along with test results.

By being both battery and mains powered, along with its tough design, you'll be able to easily take this unit with you wherever you go.

### Accessories

Earth Test Lead, Clamp, Mains Lead Adaptor and Calibration Certificate
