

## SEAWARD PRIMETEST PRO KIT

The Primetest Pro Kit is an ideal all in one test and print solution, that can easily be upgraded with extra accessories. It features the newest Seaward tester, the Primetest Pro, along with an OPTIMA II Direct Thermal Printer. These units connect to each other via Bluetooth which will allow you to test and print your own tags on the spot.

The Primetest Pro, with its new blue design, contains many of the same advanced features as the popular Primetest Elite. These include a crisp HD colour screen, QWERTY keyboard, built-in isolation transformer, Bluetooth capabilities and the ability to run the tester on mains or battery power.

The Primetest Pro has a huge 10,000 test memory storage, and comes standard with a 12-month PATGuard 3 software licence for all your asset management and reporting needs.
