

## WAVECOM TNP - PRIME

The TNP Prime is part of the new generation of Wavecom test and print kits. It is exclusively powered by a lithium ion battery that will last you over 3,000 tests. The QWERTY keyboard has been removed, and instead this model comes standard with a 4G Android Tablet, and the new WinPATs App for data collection and remote control of your tester.

The combination of the Android Tablet and the WinPATs App is what really makes this kit unique. These inclusions enable you to centralise your data with full cloud synchronisation, which means your data can be accessed by multiple users anywhere in Australia.

### Features

- » Storage capacity of 5000 items
- » Fixed and portable RCD testing
- » Print tags on the spot
- » Re-test items quickly using the scanner
- » Unit displays actual test readings
