SEAWARD PRIMETEST 125 EL

POPULAR

\$899.00 EXCL. GST

- » Battery powered
- » Leakage Current testing
- » 3 buttons to choose from
- » Offers great value

The Seaward Primetest 125 EL is a basic and lightweight appliance tester with simple push button functionality and battery operation for increased portability.

This is Seawards most recently released appliance tester and replaces the previous Primetest 125 - although it has been given a nice upgrade by now having the ability to perform Leakage Current testing.

The 125 EL still remains extremely simple to use, with a total of just 3 push buttons to choose from. On top of performing Leakage Current testing, it'll test Class 1, Class 2 and extension leads (including surge protected power boards - MOV's).

It also has a handy mains supply check function when performing leakage testing. As Australia's lowest cost appliance tester, it certainly does provide excellent value and will get the done job quickly, while at an affordable price.

Item number: SWDPT125-EL

WAVECOM TNT -EL

\$738.00 EXCL. GST

- » Basic and user-friendly
- » One button testing
- » Unique Meter Mode Function
- » Leakage Current testing
- » Battery Power

Coming in an all new ergonomic design, the Generation 6 TNT -el is an ideal choice for anyone after an easy-to-operate and simple appliance tester.

With one button push operation, it's as simple as pressing 'F1' for Class I tests and 'F2' for Class II tests. It's also capable of conducting Leakage Current testing - a rarity for a tester in this price range and a major benefit. Another additional feature is its ability to test sensitive electronic equipment that cannot be tested using a standard insulation tester.

Similar to the other Gen 6 models, it includes Wavecom's new Meter Mode function which display's volts, amps, true power and reactive power of an individual appliance.

The TNT-el is supplied with its own carry bag to help keep your tester secure, along with all the test leads and manuals.

WAVECOM TNT RCD

\$878.00 EXCL. GST

- » Tests fixed and portable RCD's
- » Build-in Lithium Ion battery
- » Large LCD display
- » In-built isolation transformer

The all new Gen 5 TNT RCD is much like the TNT -el model, but is considered one step up because it's capable of testing all 240V electrical appliances, including fixed and portable RCD's, with the in-built isolation transformer. It also features a Lithium Ion Battery that is capable of conducting 3000 sets on a single charge.

Its reliability, simple operation and RCD functionality makes The TNT RCD a great entry-level tester. It's extremely easy to navigate through the various tests you'll be required to perform and is simple as pressing 'F1' for Class I tests and 'F2' for Class II tests.

Similar to the other Gen 5 models, the TNT RCD tester includes Wavecom's new Meter Mode function which display's volts, amps, true power and reactive power of an individual appliance.

Item number: WCMTNT-RCD

KYORITSU 6205

\$1040.00 EXCL. GST

- » Battery powered
- » 999 test result storage
- » Large LCD display
- » Printer and software compatible

Kyoritsu, the makers of the ever-popular 6201A portable appliance tester, have released a brand-new tester to the Australian market - the Kyoritsu 6205. This model will perform all the tests you need to comply with the AS/NZS 3670 standard, in addition to being fast, affordable and super easy to use.

One of the major benefits of the Kyoritsu 6205 or Kew 6205 is that it is hand-held battery operated - which is a great advantage for a tester at this price point. This makes testing a workplace with many appliances in different spots a much easier task.

The bright LCD screen makes it very easy to see, even in low light areas. This unit also features a colour status backlight, which will flash Green for a Pass and Red for Fail. The testing process itself is a breeze with it's simple one button testing operation.

Item number: KYO6205

TRISAN S8

\$990.00 EXCL. GST

- » Battery and mains powered
- » Enclosed in pelican hard carry case
- » Rugged and tough design
- » One of the fastest testing times

The S8 Appliance Tester complies with the AS/NZS 3760 Standard and provides an extra rugged and tough design to ensure the safety and easy portability of your tester. This makes it ideally suited to people that require flexibility, a heavy duty case and advanced features.

One of the major positives of using this unit is that it doesn't require additional equipment that some other testers require you to purchase – especially ones at this price point. Specifically, no Isolation Transformer is required as it comes in-built, while no clover leaf or figure 8 adaptor is needed either.

On the appliance tester itself, it contains buttons that correspond to the actual tests, which makes it the process of learning how to use the S8 a simple and uncomplicated one. It also features multiple sockets – one each for leakage current and insulation resistance that feature an LED light to indicate the appropriate socket.

Item number: TRIS8

SEAWARD PAC3760 DL

\$1399.00 EXCL. GST

- » Battery operation
- » Printer compatible
- » Basic data capture
- » RCD testing

The PAC3760 DL is one of Seawards new entry-level appliance testers and replaces the previous PAC3760 +2 model. For its price range, the PAC3760 DL offers great value with an abundance of features and simple functionality.

It contains a unique 9 button push operation, with each button corresponding to a particular test or command. Your results can then be stored on the tester and downloaded onto the computer, with a total storage of 1000 test results. Usefully, this appliance tester can also be upgraded at a later date to include a printer, while also containing 3 Phase testing capabilities by adding an adaptor.

It's capable of testing both fixed and portable RCD's (Isolation Transformer is built-in), which is a great add-on if you're after a low-cost appliance tester with RCD testing capabilities.

The PAC3760 DL is supplied with all the test leads, along with a protective case.

Item number: SWDPAC3760DL

METREL DELTAPAT 3309 BT

BEST
SELLER

The Metrel DeltaPAT 3309 BT is one the best testers in its price range and an extremely user-friendly and cost-effective option. Its vast array of powerful features will make testing and tagging an easy and effortless process, while also offering the full suite of testing options.

The DeltaPAT can perform every test required by Australian Standards, all of which are completed with exceptionally fast testing times. Conveniently, there's no need for an Isolation Transformer for when you test RCD's. It is both battery and mains power operated, which essentially makes it suitable for testing all types of environments. It's also got a lightweight and portable design, so you can easily take it with you on the road and on site.

Test results can be stored onto the tester, which has an internal memory of 1500 results. These results can then be transferred to your PC via USB with the supplied PATlink PC software.

The tester is easily upgradeable to include a scanner and printer, whereby you can use Bluetooth functionality for connecting everything together.

\$1599.00 EXCL. GST

- » Internal memory
- » In-built Bluetooth
- » Comprehensive testing
- » RCD testing
- » Battery and mains powered

Item number: METDELTAPAT BT

SEAWARD PRIMETEST PRO

\$2599.00 EXCL.
GST

- » HD Colour Screen
- » QWERTY keyboard
- » 12-month PATGuard Software Licence
- » 10,000 test memory storage
- » Bluetooth technology

The Primetest Pro is the latest tester from Seaward to hit the Australian market, and it is the perfect option if you're looking for a comprehensive test and tag unit without the top range price tag.

The Primetest Pro, with its new blue design, contains many of the same advanced features as the popular Primetest Elite. These include a crisp HD colour screen, QWERTY keyboard, built-in isolation transformer, Bluetooth capabilities and the ability to run the tester on mains or battery power.

The Primetest Pro has a huge 10,000 test memory storage, and comes standard with a 12-month PATGuard 3 software licence for all your asset management and reporting needs.

The tester and your other equipment will also be easily transportable in the custom heavy-duty backpack that's included.

Item number: SWDPT-PRO

DELTAPAT & GODEX COMPLETE

NEW!

\$3300.00 EXCL.
GST

- » Complete printing solution
- » Fully battery operated
- » Bluetooth connectivity
- » Barcode and QR tag printing
- » Heavy duty case

The Metrel DeltaPAT Complete uses Bluetooth technology to connect your DeltaPAT appliance, Godex Bluetooth Printer and Android Smart Device all together. This means you'll be able to use an Android device as a remote control to run your tests.

The Godex Printer will then print your tags on the spot with the required information and company logo. When it comes time for retesting there's no need for a scanner, as your Smart Device will scan the QR barcode and show you all of the previous test results instantly.

All of the components in the Complete package can easily be transported, as they perfectly fit into the custom heavy duty carry case.

By using the DeltaPAT Complete to its fullest capability, it'll offer you a complete printing solution and significantly speed up your entire test and tag process.

Item number: SPDELTAPATCOMP2

POPULAR

WAVECOM TNP-500

\$2999.00 EXCL. GST

- » High volume testing
- » Print labels onsite
- » Mobile memory unit
- » All-in-one-kit
- » RCD testing

The TnP-500 was specially designed to streamline the entire test and tag process, making it particularly ideal for people needing to test a large number of appliances. This might include those operating a test and tag business or obliged to test large facilities or multiple sites.

This setup comes completely integrated in a robust carry case, with all of the accessories you'll need complete the test and tag process, including a thermal printer, barcode scanner, WinPAT's software and keyboard.

The TnP-500 effectively allows you to print professional labels on the spot and then easily re-test items using the barcode scanner. Using WinPAT's Premium software, you won't need to record any of your results manually, as your appliance tester will seamlessly connect to your computer (no need to have a PC with you when on site testing).

The TnP Appliance Tester will conduct all tests required by AS/NZS 3760 (including RCD testing), with results shown on the display and a total storage of 5000 items.

Item number: WCMTNP-500

SEAWARD PRIMETEST ELITE+

\$3799.00 EXCL.
GST

- » Highly advanced
- » HD colour screen
- » Camera with flash
- » Battery operation
- » 50,000 test memory

The Seaward Primetest Elite+ is considered one of the most advanced and feature packed portable appliance testers on the Australian market.

It is fully programmable, so you can adjust how it functions to suit the way you test. All of your accessory equipment will be able to communicate with the Primetest Elite+ via Bluetooth technology. Meanwhile, it contains other great features such as battery operation, RCD testing, a built in camera with flash and crisp colour screen.

The Primetest Elite+ also contains an in-built QWERTY keyboard, making data entry an easy process, while also giving you greater control. Once tests are complete, you can use the USB port to easily download results to the PATGuard PC software (software not supplied).

This appliance tester can also be purchased as a kit with a Bluetooth Scanner, Bluetooth Printer, Patguard Elite Software and Carry Case.

Item number: SWDPT-ELITE

SEAWARD PRIMETEST PRO KIT

\$3990.00 EXCL.
GST

- » Primetest Pro PAT Tester
- » OPTIMA II Printer
- » 12-month PATGuard Software Licence
- » Bluetooth technology
- » Custom backpack

The Primetest Pro Kit is an ideal all in one test and print solution, that can easily be upgraded with extra accessories. It features the newest Seaward tester, the Primetest Pro, along with an OPTIMA II Direct Thermal Printer. These units connect to each other via Bluetooth which will allow you to test and print your own tags on the spot.

The Primetest Pro, with its new blue design, contains many of the same advanced features as the popular Primetest Elite. These include a crisp HD colour screen, QWERTY keyboard, built-in isolation transformer, Bluetooth capabilities and the ability to run the tester on mains or battery power.

The Primetest Pro has a huge 10,000 test memory storage, and comes standard with a 12-month PATGuard 3 software licence for all your asset management and reporting needs.

The tester, printer and your other equipment will also be easily transportable in the custom heavy-duty backpack that's included.

Item number: SPSWDPTPROKIT

\$3800.00 EXCL. GST

- » Advanced PAT solution
- » aPAT android interface
- » Effortless data entry
- » Speeds up the test & tag process

METREL DELTA PRO PRINT PACK

POPULAR

Metrel's all new complete appliance testing package has now arrived in Australia. The Delta aPAT Pro Print Pack is an advanced Portable Appliance Testing solution with incredible features that'll transform the way you test and tag.

It includes the highly comprehensive DeltaPAT 3309 BT tester, a Zebra Bluetooth P4T for printing high quality labels with custom logos and an advanced aPAT android interface for easy data entry. All of this comes contained in a custom built heavy duty case, making it perfect for transportation.

The DeltaPAT 3309 BT tester and Printer will operate on batteries or mains power, whereas the Zebra ZQ520 Printer will print Thermal Transfer test tags. Re-testing items is made simple with QR codes.

The supplied aPAT interface enables fast and simple data management of tested appliances and a quick overview of performed tests by scanning a QR code. All results can be sent to the main office before leaving the test site, while also be able to enter and save data by using the smart device.

Item number: SPDELTAPOPRINT

WAVECOM TNP PRIME

\$4298.00 EXCL. GST

- » TNP Prime Intergrated Appliance Tester
- » 8 Inch 4G Android Tablet
- » Lithium Ion Battery
- » Bluetooth Laser scanner
- » Heavy Duty Carry Case with Wheels

This new generation test and print kit by Wavecom is uniquely designed to include features that position it ahead of the previous generation Wavecom models. This kit comes with several great features that are just hard to ignore.

It is exclusively powered by a lithium ion battery that will last you over 3,000 tests. This model comes standard with a 4G Android Tablet, and the new WinPATs App for data collection and remote control of your tester. It also includes a wireless Bluetooth scanner for retesting.

What makes this kit truly special is the combination of the Android Tablet and the WinPATs App. These features allow you to centralise your data and sync it with the cloud, allowing many users to view it from anywhere in Australia. You can quickly manage your assets, create reports, configure logos, and print particular test data on your tags using the WinPATs software.

It comes in a custom-made heavy duty carry case with wheels and a carry handle included, so you'll be able to move around with ease.

Item number: WCMTNP-PRIME

SEAWARD ELITE+ KIT

\$7999.00 EXCL. GST

- » Primetest Elite included
- » ProTag XL test tag printer
- » PATGuard Elite 3 software
- » Bluetooth scanner
- » Elite carry case

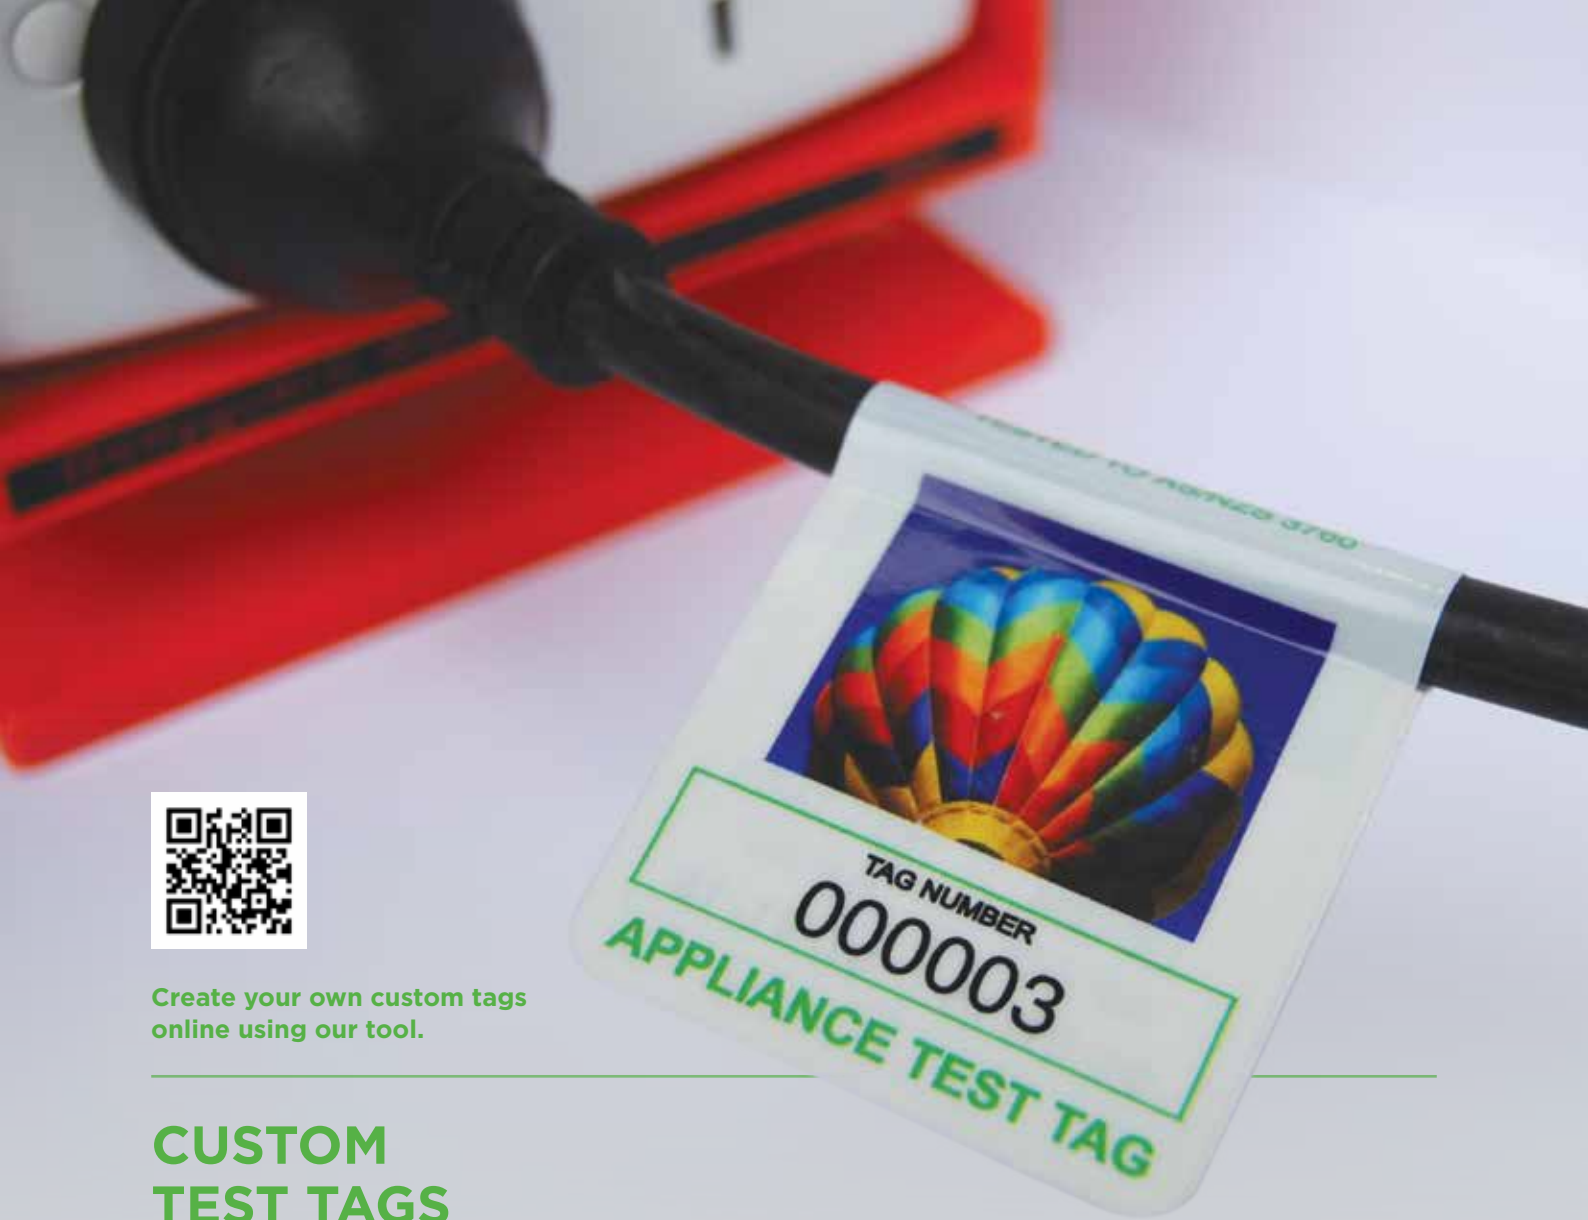

The Seaward Elite Kit is arguably the most advanced and complete package available on the Australian market. The number of powerful features and benefits this kit provides when testing and tagging is endless, meaning that it will undoubtedly increase your overall productivity and make your PAT testing an easier process.

The supplied Primetest Elite is considered one of the most comprehensive appliance testers available, with features such as battery operation, RCD testing capabilities, fully programmable testing, built-in camera with flash and HD colour display.

The advanced PATGuard Elite 3 software supplied with the Elite Kit allows you to create an assortment of reports for data management, email reminders for retesting, invoicing, quotation and much more.

You'll be able to print Direct Thermal tags on the spot using the ProTag XL printer (different printer in image above), as well as use a battery powered scanner for retesting items effortlessly.

Item number: SPSWDELITEKIT

Create your own custom tags
online using our tool.

CUSTOM TEST TAGS

- » Save time with pre-printed data
- » High quality full colour images
- » Add barcodes and QR codes
- » Optional protective laminated flap for extra durability
- » Promote your business and gain repeat customers
- » Packets supplied with 100 tags and a permanent marker pen

Customised Tags are an easy time-saving solution to help avoid writing each tag by hand. Instead, each tag is pre-printed with the data you need. You can also have your company logo or business details placed on the tag to help promote your business.

We manufacture our customised tags in-house, so you'll have the benefit of talking directly with the company responsible for the design of your tags.
