SEAWARD PRIMETEST 125 EL

$596.00 ^{EXCL. GST}

≫ Battery powered

≫ Leakage Current testing

≫ 3 buttons to choose from

≫ Offers great value

The Seaward Primetest 125 EL is a basic and lightweight appliance tester with simple push button functionality and battery operation for increased portability.

This is Seawards most recently released appliance tester and replaces the previous Primetest 125 - although it has been given a nice upgrade by now having the ability to perform Leakage Current testing.

The 125 EL still remains extremely simple to use, with a total of just 3 push buttons to choose from. On top of performing Leakage Current testing, it'll test Class 1, Class 2 and extension leads (including surge protected power boards - MOV's).

It also has a handy mains supply check function when performing leakage testing. As Australia's lowest cost appliance tester, it certainly does provide excellent value and will get the done job quickly, while at an affordable price.

Item number: SWDPT125-EL

WAVECOM TNT –EL

$681.00 ^{EXCL. GST}

≫ Basic and user-friendly

≫ One button testing

≫ Unique Meter Mode Function

≫ Leakage Current testing

Coming in an all new ergonomic design and featuring a built-in carry handle, the Generation 4 TNT -el is an ideal choice for anyone after an easy-to-operate and simple appliance tester.

With one button push operation, it's as simple as pressing 'F1' for Class I tests and 'F2' for Class II tests. It's also capable of conducting Leakage Current testing - a rarity for a tester in this price range and a major benefit. Another additional feature is its ability to test sensitive electronic equipment that cannot be tested using a standard insulation tester.

Similar to the other Gen 4 models, it includes Wavecom's new Meter Mode function which display's volts, amps, true power and reactive power of an individual appliance.

The TNT-el is supplied with its own carry bag to help keep your tester secure, along with all the test leads and manuals.

Item number: WCMTNT-EL

WAVECOM TNT –ELB

$698.00 EXCL. GST

≫ Battery powered

≫ One button testing

≫ Leakage Current testing

≫ Batteries don't need to be changed

The TNT -elb is Wavecom's newest appliance tester to hit the Australian markets. It offers the same testing abilities as the TNT -el, but does offer an additional power bank for battery operation and increased portability

However, it still contains the same simple and easy-to-use functionality and offers great value.

The lithium battery pack allows you to conduct up to 3000 tests before it needs any recharging, which can be done from any phone charger (you won't ever need to change the batteries).

The Australian made TNT -elb is also capable of conducting Leakage Current testing when plugged into 240V power. Another additional benefit is its ability to test sensitive electronic equipment that can't be tested using a standard Insulation tester.

Item number: WCMTNT-ELB

KYORITSU 6201A

$909.00 EXCL. GST

≫ Easy test selection

≫ Super-fast testing

≫ Large LCD display

≫ Highly robust

Known for being robust and highly reliable, the 6201A contains four functions in total, with the ability to test Class I, Class II, Leakage Current and Extension Leads. Conveniently, the Insulation Resistance test is also selectable at both 250V and 500V — a great option to have when it comes to testing particular items.

Overall, it's a very simple tester to use - just by turning the rotary dial to the test you want, it will automatically complete the tests in less than 5 seconds; this is considered a particularly fast testing time for even a top appliance tester. In addition to this, it also features a convenient auto test sequencing function.

Once your test is complete, the 6201A's large LCD display will clearly indicate a PASS or FAIL with its four LED lights. If you're wanting exact readings and values as well, they're also shown on the LCD display.

Item number: KYO6201A

WAVECOM
TNT RCD KIT

$990.00 EXCL. GST

≫ RCD testing
≫ Simple operation
≫ Isolation Transformer included
≫ Heavy Duty Carry Case

The updated Generation 4 TNT RCD is much like the -el model, but is considered one step up because it's capable of testing all 240V electrical appliances, including fixed and portable RCD's. Its reliability, simple operation and RCD functionality makes the TNT RCD a great entry-level tester.

It comes with an Isolation Transformer that enables you to test portable RCD's - this handy device will ensure you never trip buildings RCD accidently. The Isolation Transformer and TNT RCD appliance tester will both conveniently fit into the heavy duty carry case, so you can easily transport your gear when you're on the road.

Like all the other Gen 4 TNT models, it comes standard with the Meter Mode function which allows you to display volts, amps, true power and reactive power of an individual appliance. It'll also test sensitive electronic equipment which can't be tested using a standard insulation tester.

Item number: WCMRCDKIT

SEAWARD
PAC3760 DL

$1045.00 EXCL. GST

≫ Battery operation
≫ Printer compatible
≫ Basic data capture
≫ RCD testing

The PAC3760 DL is one of Seawards new entry-level appliance testers and replaces the previous PAC3760 +2 model. For its price range, the PAC3760 DL offers great value with an abundance of features and simple functionality.

It contains a unique 9 button push operation, with each button corresponding to a particular test or command. Your results can then be stored on the tester and downloaded onto the computer, with a total storage of 1000 test results. Usefully, this appliance tester can also be upgraded at a later date to include a printer, while also containing 3 Phase testing capabilities by adding an adaptor.

It's capable of testing both fixed and portable RCD's (Isolation Transformer is built-in), which is a great add-on if you're after a low-cost appliance tester with RCD testing capabilities.

The PAC3760 DL is supplied with all the test leads, along with a protective case.

Item number: SWDPAC3760DL

METREL
DELTAPAT 3309 BT

The Metrel DeltaPAT 3309 BT is one the best testers in its price range and an extremely user-friendly and cost-effective option. Its vast array of powerful features will make testing and tagging an easy and effortless process, while also offering the full suite of testing options.

The DeltaPAT can perform every test required by Australian Standards, all of which are completed with exceptionally fast testing times. Conveniently, there's no need for an Isolation Transformer for when you test RCD's. It is both battery and mains power operated, which essentially makes it suitable for testing all types of environments. It's also got a lightweight and portable design, so you can easily take it with you on the road and on site.

Test results can be stored onto the tester, which has an internal memory of 1500 results. These results can then be transferred to your PC via USB with the supplied PATlink PC software.

The tester is easily upgradeable to include a scanner and printer, whereby you can use Bluetooth functionality for connecting everything together.

Item number: METDELTAPAT BT

$1340.00 EXCL. GST

» Internal memory
» In-built Bluetooth
» Comprehensive testing
» RCD testing
» Battery and mains powered

MEGGER
PAT150

$1178.00 ^{EXCL. GST}

» RCD testing
» Rubber armored casing
» Battery powered
» Simple display screen

The all new Megger PAT150 is a simple, fast and reliable tester, capable of being used in any type of environment. Test times are reduced to a minimum, as it conveniently shows PASS or FAIL items with a simple tick or cross.

It can test all types of Class I and Class II appliances and tests extension leads, power leads, surge protected appliances and Portable RCD's.

The Megger PAT150 is also an exceptionally tough appliance tester, as it is equipped with scratch proof glass and rubber armored casing.

For people after an easy-to-use tester that's ready to use out of the box, while also having that added protection, the PAT150 is an excellent choice.

Item number: MEGPAT150-AU

SAFETCHECK
PRO LOGGER PLUS

$1995.00 ^{EXCL. GST}

» RCD testing
» Hard bodied pelican case
» Free flexible keyboard
» Battery operated

The Trio Pro Logger PLUS is high quality Australian made appliance tester with RCD test functionality and an internal memory.

This unit replaces the previous Pro Logger II and has been upgraded to now include battery operation for greater portability.

The Pro Logger PLUS comes enclosed in a hard bodied pelican case for superior protection, while also still having unique features that help keep the Pro Logger unique to the rest.

A flexible keyboard comes with unit for simple data entry and full control, while its integrated data logger is capable of storing 2000 records.

Known as one of the safest testers in Australia, the Pro Logger PLUS offers additional safety features not found in other testers.

Item number: STCPROLPLUS

SEAWARD
PRIMETEST 300

$2296.00 EXCL. GST

» Fully programmable
» In-built keyboard
» Bluetooth capabilities
» Battery operated
» Free PATGuard Pro 2 software

The Seaward Primetest 300 is a top of the range appliance tester that's fully programmable, battery operated, tests RCD's (Residual Current Device) and is connected to all of your accessories through its Bluetooth technology.

This highly specified tester will enable you to work more efficiently and speeds up your test times through its large selection of helpful features. The lightweight and compact Primetest 300 also contains on-screen help, an in-built alpha keyboard for data entry and stores all of your results.

The Bluetooth technology incorporated into this machine means that it will communicate with all of your accessory equipment without a wire in sight. It also comes with a free copy of PATGuard Pro 2 Software for data and asset management.

The Primetest 300 can also be purchased as a kit to include a Bluetooth scanner, printer, PATGuard Pro software and carry case.

Item number: SWDPT300

WAVECOM
TNP-500

$3287.00 EXCL. GST

» High volume testing
» Print labels onsite
» Mobile memory unit
» All-in-one-kit
» RCD testing

The TnP-500 was specially designed to streamline the entire test and tag process, making it particularly ideal for people needing to test a large number of appliances. This might include those operating a test and tag business or obliged to test large facilities or multiple sites.

This setup comes completely integrated in a robust carry case, with all of the accessories you'll need complete the test and tag process, including a thermal printer, barcode scanner, WinPAT's software and keyboard.

The TnP-500 effectively allows you to print professional labels on the spot and then easily re-test items using the barcode scanner. Using WinPAT's Premium software, you won't need to record any of your results manually, as your appliance tester will seamlessly connect to your computer (no need to have a PC with you when on site testing).

The TnP Appliance Tester will conduct all tests required by AS/NZS 3760 (including RCD testing), with results shown on the display and a total storage of 5000 items.

Item number: WCMNP-500

DELTAPAT COMPLETE

$3069.00 EXCL. GST

≫ Complete printing solution
≫ Fully battery operated
≫ Bluetooth connectivity
≫ Barcode and QR tag printing
≫ Heavy duty case

The Metrel DeltaPAT Complete uses Bluetooth technology to connect your DeltaPAT appliance, Zebra Printer and Android Smart Device all together. This means you'll be able to use an Android device as a remote control to run your tests.

The Zebra Printer will then print your tag on the spot with the required information and company logo (the printer is supplied with a NiMH rechargeable battery for transportation). When it comes time for retesting there's no need for a scanner, as your Smart Device will scan the QR barcode and show you all of the previous test results instantly.

All of the components in the Complete package can easily be transported, as they perfectly fit into the custom heavy duty carry case.

By using the DeltaPAT Complete to its fullest capability, it'll offer you a complete printing solution and significantly speed up your entire test and tag process.

Item number: SPDELTAPATCOMP

SEAWARD PRIMETEST ELITE

$3181.00 EXCL. GST

≫ Highly advanced
≫ HD colour screen
≫ Camera with flash
≫ Battery operation
≫ 50,000 test memory

The Seaward Primetest Elite is considered one of the most advanced and feature packed portable appliance testers on the Australian market.

It is fully programmable, so you can adjust how it functions to suit the way you test. All of your accessory equipment will be able to communicate with the Primetest Elite via Bluetooth technology. Meanwhile, it contains other great features such as battery operation, RCD testing, a built in camera with flash and crisp colour screen.

The Primetest Elite also contains an in-built QWERTY keyboard, making data entry an easy process, while also giving you greater control. Once tests are complete, you can use the USB port to easily download results to the PATGuard PC software (software not supplied).

This appliance tester can also be purchased as a kit with a Bluetooth Scanner, Bluetooth Printer, Patguard Elite Software and Carry Case.

Item number: SWDPT-ELITE

METREL
DELTA PRO PRINT PACK

$3570.00 ^{EXCL. GST}

» Advanced PAT solution

» aPAT android interface

» Effortless data entry

» Speeds up the test & tag process

Metrel's all new complete appliance testing package has now arrived in Australia. The Delta aPAT Pro Print Pack is an advanced Portable Appliance Testing solution with incredible features that'll transform the way you test and tag.

It includes the highly comprehensive DeltaPAT 3309 BT tester, a Zebra Bluetooth P4T for printing high quality labels with custom logos and an advanced aPAT android interface for easy data entry. All of this comes contained in a custom built heavy duty case, making it perfect for transportation.

The DeltaPAT 3309 BT tester and Printer will operate on batteries or mains power, whereas the Zebra P4T allows printing on the spot for both Direct Thermal (heat sensitive) and Thermal Transfer (ribbon) test tags. Re-testing items is made simple with QR codes.

The supplied aPAT interface enables fast and simple data management of tested appliances and a quick overview of performed tests by scanning a QR code. All results can be sent to the main office before leaving the test site, while also be able to enter and save data by using the smart device.

Item number: SPDELTAPROPRINT

SEAWARD OPTIMA II KIT

$4591.00 <superscript>EXCL. GST</superscript>

» Primetest 300 included
» Direct thermal printer
» PATGuard Pro 2 software
» Bluetooth scanner
» Carry case

This remarkable kit includes everything you'll need to test electrical appliances at a professional level. All of the included accessories are considered 'top of the range', which means they can all be seamlessly connected to each other via Bluetooth.

The included Seaward Primetest 300 is a fully programmable tester that connects to all of your accessories via Bluetooth. It can complete any test you require and has advanced features that's second to none.

The highly useful PATguard Pro 2 is the software package that's supplied with this kit, which will let you create an assortment of reports and help with overall data management.

The Optima II Bluetooth Printer prints durable Direct Thermal test tags that don't require any connection cables, whereas the Barcode Scanner is battery powered and connected via Bluetooth.

Item number: SPSWDPTOPT

SEAWARD ELITE KIT

$7500.00 <superscript>EXCL. GST</superscript>

» Primetest Elite included
» Elite Bluetooth printer
» PATGuard Elite 3 software
» Bluetooth scanner
» Elite carry case

The Seaward Elite Kit is arguably the most advanced and complete package available on the Australian market. The number of powerful features and benefits this kit provides when testing and tagging is endless, meaning that it will undoubtedly increase your overall productivity and make your PAT testing an easier process.

The supplied Primetest Elite is considered one the most comprehensive appliance testers available, with features such as battery operation, RCD testing capabilities, fully programmable testing, built-in camera with flash and HD colour display.

The advanced PATGuard Elite 3 software supplied with the Elite Kit allows you to create an assortment of reports for data management, email reminders for retesting, invoicing, quotation and much more.

You'll be able to print Direct Thermal or Thermal Transfer tags on the spot with the Elite Bluetooth printer, as well as use a battery powered scanner for retesting items effortlessly.

Item number: SPSWDELITEKIT

CUSTOM TEST TAGS

Please enquire for pricing

» Save time with pre-printed data

» High quality full colour images

» Test resistant material

» Add barcodes and QR codes

» Optional protective laminated flap for extra durability

» Promote your business and gain repeat customers

» Packets supplied with 100 tags and a permanent marker pen

Whether you're running a test and tag business or you've been given the task of testing items within your company — it's no secret that custom test tags will help make your job easier.

Customised Tags are an easy time-saving solution to help avoid writing each tag by hand. Instead, each tag is pre-printed with the data you need. You can also have your company logo or business details placed on the tag to help promote your business.

We manufacture our customised tags in-house, so you'll have the benefit of talking directly with the company responsible for the design of your tags.

Tag type	Description
Light Duty Test Tags	ALL-PURPOSE
Heavy Duty Test Tags	SELF-LAMINATING FLAP
Industrial Strength Test Tags	SUPERIOR DURABILITY

Create your own custom tags online using our tool.
